About me

I am a front-end developer who proudly works in the field of web programming. As a front-end developer, I have great interest and expertise in programming, I started programming and computer activities in it 2019 was able to enter the big world of programming with the popular C# programming language. In this way, I found my interest in front-end and started my activity in front-end and started learning it. After hard work and training, I was able to gain good experiences in this direction and successfully completed projects with different challenges.

Work Experience

Taftaco company - FrontEnd Developer & Programmer

I started working with Taftaco in February 2023 and I work in the field of designing and building websites using JavaScript language and libraries, NextJs, ReactJs and TailwindCSS.
